

Etac My-Loo

Raised toilet seat,
with fixed mounting

 etac®

Next level – A new generation of toilet aids that creates possibilities

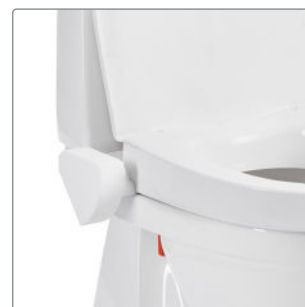

My-Loo raised toilet seat with fixed mounting belongs to a whole new generation of smart products from Etac. By setting the highest requirements on everything from safety and comfort to adaptability and ease of installation, we can present a range that offers innovative, unique solutions.

With this new product series, we quite simply take toilet aids to a new level. ‘Design drives development’ has always been our guiding principle, and we are convinced that Etac My-Loo will help users and prescribers to create new possibilities.

Patented arm support solution

Etac My-Loo's innovative arm support feature has an entirely unique height-adjustment mechanism. In addition, the armrests can be conveniently folded up and down with no pinching risk for the user. This patented solution provides optimal individualised support around the toilet.

The height of the armrests is set with a simple manual adjustment. Choose a setting by sliding the orange control into one of the three positions. The steps are clearly marked with 1, 2, 3 on the armrest.

The armrests are mounted from above – perfect for confined spaces. The armrests are marked with L and R - intended for the user's left and right side respectively.

For dismantling, the armrest is folded up and pulled straight upwards to remove it from its bracket.

The armrest can be locked into the desired position using a screw (included).

When only one armrest is used, the opening of the empty bracket is shielded by a cover (included).

Etac My-Loo

With a unique, patented arm support solution, a well-designed seat and quick, simple installation, My-Loo with fixed mounting offers safe support, a high level of comfort and ease of handling. The raised toilet seat is suitable for most toilets and sits securely in place.

Developed to give independence with dignity

My-Loo enables users with reduced mobility or balance problems to manage toilet visits independently and safely. The raised seat and stable armrests make it easier to sit down and stand up from the toilet. An extra-large seat opening and generous hygiene recesses make personal hygiene easier.

Available in five different versions

Etac My-Loo with fixed mounting is available in different designs, with or without armrests and in seat heights of 2, 6 and 10 cm. If necessary, armrests can be added later to a model without armrests.

Etac My-Loo raised toilet seat with fixed mounting.

Maintenance

Clean / disinfect the product using a standard non-abrasive cleaning agent with a pH between 5 and 9, or with a 70% disinfectant solution. The product can be safely cleaned in a cabinet washer-disinfector at 85 °C for 3 minutes.

Features

Adjustable armrests

Using a unique, patented solution, the armrests can quickly and easily be adjusted in height. They are easily folded up and down with no pinching risk for the user. If needed My-Loo can be used with only one armrest.

Simple, convenient installation

Etac My-Loo is installed quickly and easily using an innovative new solution. Practical, quick nuts make it possible to attach the raised toilet seat from above. The seat and armrests can then be clicked smoothly into their brackets.

Spacious and practical

Generous recesses and an extra-large seat opening provide excellent accessibility. The raised toilet seat's design, with free space around the seat, provides plenty of room for all body shapes.

Stable

My-Loo fixed sits securely in place and has a max user weight of 150 kg. For additional support and increased weight capacity, the accessory supporting legs can be added (max user weight 200 kg).

Safe and comfortable

With stable, easy-grip armrests and a well-designed seat, My-Loo makes toilet visits safe and comfortable for the user. For extra comfort, a soft seat can be added.

Easy to clean

The clean, smooth surfaces are easy to wipe with a soft cloth. Should separate cleaning be required, the seat and armrests are easy to remove from their brackets and equally simple to put back in place.

My-Loo 2 cm – functional toilet arm support

My-Loo 2 cm is the perfect arm support solution for around the toilet if you want to avoid drilling into the walls or floor. The product consists of armrests and a toilet seat mounted directly onto the toilet. As with the other versions with a raised seat, the armrests can be set to three different heights to suit the needs of different users. With its modern, discreet design, My-Loo blends in beautifully with most bathroom environments.

Etac My-Loo is delivered in a smart flatpack carrycase for easy handling

Accessories
